

WARDROBE BUYING GUIDE

GÜNTIER™

WHY MODULAR WARDROBES

GUNTIER designs and creates wardrobes customized to your requirements and specifications. The wardrobes can easily be installed in one home, then dismantled and reinstalled in another home. Modular wardrobes use smart fittings to ensure optimum storage and usage, and you get the best price guaranteed. The wardrobes are factory finished using international machinery to create high quality products, which allows for consistent finish everytime. Starting with your materials and finishes, to customizing the exterior and interior, to finalizing the small details, GUNTIER is a one stop shop for your complete wardrobe solution.

Wardrobe Shutters

MDF (Medium Density Fiberboard) is an engineered wood material that is made of small wood fibers glued together at very high temperatures, creating a solid, compact piece. It is primarily used for making the shutters. The attributes of MDF are:

- Smooth surface, making it easier to paint
 - The smoothness of MDF allows for versatility in design finish.
 - The consistency of the material permits for easy cutting for detailed, intricate designs.
 - Stable (won't expand or contract)
 - Water resistant once sealed properly on all edges
- Laminated plywood is also used as wardrobe shutters . Plywood is waterproof and solid and can withstand extreme weather conditions.

Cabinet Materials

The wardrobes are primarily manufactured using either particleboard or plywood.

Particleboard is made by gluing together very small chips of wood, and compressing the mixture to form flat boards to make cabinetry. Attributes of Particleboard:

- Laminated at the time of manufacture
- Cheaper than plywood
- Smoother and cleaner than plywood, leaving a flat, slick finish
- Environmentally friendly: using scraps of other lumbar products, and no waste is generated
- All scraps are dipped in an anti-termite solution, making the material highly termite resistant
- Once sealed properly, then highly resistant to moisture and humidity

Plywood

Plywood is an engineered material that is made by pressing and binding sheets of wood veneer into a solid piece. Attributes of Plywood:

- Made from multiple layers of veneer, making it very strong to work with.
- Won't soak up water and liquids easily
- Does not expand or shrink
- Resists extreme weather conditions

Finishes

GUNTIER offers various finishes which are listed below:

LAMINATE SHUTTERS

Laminate shutters add an element of style to your living space. In a laminate shutter you have a choice of a glossy, matt, or textured appearance. Laminate shutters are sealed on all sides with an edge band, which adds to the character of the shutter. Laminate, as a material, is scratch resistant. This finish is very easy to clean and maintain. It is highly scratch resistant and only requires a moist cloth with mild detergent to wipe down the shutters.

MEMBRANE

Membrane shutters give a very smooth and precise look. The shutters are manufactured using textured and matt foils that are wrapped around all sides, eliminating the need to seal the edges with a different element. Membrane is highly scratch resistant and very easy to clean and maintain, with the use of a moist cloth and mild detergent on the shutters.

veneer

Veneer shutters have a smooth wooden look. They are the perfect substitute for solid wood, adding warmth and coziness to any home. The shutters are manufactured using high quality materials, and are available in matt and high gloss finish. GUNTIER veneer shutters are unique, as they are molded on all four edges to maintain the grain orientation, and are exclusively with us. Being scratch resistant, they are easily maintained with the use of a microfiber cloth and mild detergent.

LAQUERED

Lacquered shutters have a very rich and contemporary look, adding a modern touch to any home. It is available in a variety of colors with matt or high gloss finish. Due to the shutters' extreme gloss levels, lacquered shutters are easily protected against scratches with regular use of a mild detergent and a microfiber cloth.

TYPES OF WARDROBE SHUTTERS

GUNTIER offers a wide range of wardrobe shutters in many finishes and types. The following are offered by GUNTIER:

HINGE DOOR WARDROBES

Hinge door wardrobes are our standard wardrobe solution, where the wardrobe opens directly in front. As a user, you will require space to allow room for opening the wardrobe, and you can access the entire wardrobe at once.

SLIDING DOOR WARDROBES

Sliding door wardrobes are wardrobes where the shutters slide to the opposite sides to get access to the wardrobe. It is beneficial in narrow spaces such as passageways or hallways. Sliding door wardrobes require a lot of opening and closing access all aspects of the wardrobe. Depending on the number of shutters, you can access $\frac{1}{2}$ or $\frac{1}{3}$ of the wardrobe at

SLIDING FOLDING

Sliding-folding wardrobes have shutters that open by being folded towards a particular side. You can access the entire wardrobe at once, with the shutters folded against the sides of the wardrobe. Sliding-folding wardrobes are practical if there is enough space in front of the wardrobe to allow for the opening of the shutter.

Handles vs. Handle-less

HANDLES

Shutters and drawers with handles are the conventional choice for a given space. They add to the classic look of any kitchen, and complement any shutter or drawer. Handles accentuate the overall appearance and are very versatile. They are a single touch-point to open a shutter or a drawer, and they are available in a variety of shapes and sizes.

HANDLE LESS

Handle-less shutters are very contemporary and stylish, adding to a seamless look of a kitchen. It gives the kitchen a flushed façade. Handle-less wardrobes are easier to maintain and clean, requiring a simple wipe down of the surfaces. This also makes them more hygienic as there are no handles that will collect dirt or grime with constant use. The smooth texture adds to the effortless movement, without worrying about any clothing getting caught due to handles being in your way.

STORAGE OPTIONS

GUNTIER provides various storage options for your wardrobe. The standard depth of the wardrobe is 2 FT. and it is customized in a way to accomodate all your requirments. The following are offered:

Hanging Rod- Hanging rods are a standard in every wardrobe. The benefits of a hanging rod are that your clothes take up just half of the space. Therefore, you can easily add two hanging rods to fully utilize the wardrobe space that is allotted to you.

Tandem Lift- Many wardrobes, especially in Indian households, are built with very high ceilings. Don't let that stop you from building a higher wardrobe! The solution for this type of a wardrobe is a tandem lift, where you are able to pull a **hanging** rod down to access your clothes. It is another way of fully optimizing your wardrobe space.

Tall Hanging- For our Indian-wear the regular hanging rods are not sufficient. We all need a solution where clothes can simply hang without getting crushed or folded at the bottom. Here the tall hanging is an ideal storage option. Your **clothers** are stored easily and conveniently.

Shelves- Shelves are also a standard in wardrobes. They are ideal for folded t-shirts or jeans/shorts. All the shelves at GUNTIER are adjustable. Therefore, they can be placed at whichever distance that you desire.

Drawers- Drawers are another standard storage solution in wardrobes. Drawers can be used for storing smaller items, such as pocket squares or scarves. They are available in multiple sizes.

Pullouts- Pullouts are the combination of shelves and drawers. They appear like a shelf, but they can pull out like drawers. Pullouts also often used as storage solutions for several folded clothing items, such as jeans or t-shirts.

Loft- The loft is an option that goes above the main wardrobe. Due to the season changes here in India, we need space to store our off-season clothes. The loft serves as the ideal storage solution. It is out of the way, yet not too far from your existing wardrobe. The loft can also be used for storing your linens and other items that are used infrequently.

Wardrobe Lighting

Battery Operated Lights :
Battery-operated lights are ideal for smaller wardrobes. There are a variety of wall-mounted and ceiling-mounted fixtures available to match the overall theme of your wardrobe colors and design.

LED Sensor Lights:
Sensor lights are slightly more advanced than battery-operated lights. Sensor lights operate with a magnetic strip while open and closing the wardrobe. They are the perfect option for frequently used wardrobes and storage areas, and are also available in a variety of fixtures to customize to the overall appearance of your wardrobe.
